

Dear Chairman,

On June 2nd please do not allow the consolidation of media markets into still smaller hands. In so doing, our country runs the risk of losing not only possibly diversity and alternatives on the airways, but the reduction of "localized" news and emergency information. The history of media consolidation teaches us more about disregard and neglect of local communities than of creating a larger unified community. In a world of growing diversity we need to preserve our outlets for diversity not merely in thought but in practice. Please stop this initiative, Chairman, for the good of this country.

Sincerely,

Keith Levene
